[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. rRevised.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group	County	Industry group
Barren	23	Jefferson	201, 203, 208, 209, 211, 232, 242, 265, 271, 281, 282, 285, 329, 335, 343, 346, 349, 352, 356, 358, 371, and 39
Boyd	291 and 331		
Boyle	231		
Campbell	208, 231, and 331	McCracken	225, 281, 314, and 37
Carter	325	Marshall	281
Daviess	212 and 367	Pulaski	231
Fayette	357 and 36	Taylor	232
Franklin	208	Warren	232 and 359
Graves	231	Woodford	208

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

1954	8 092	28 922	8 037	28 592	55	330

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Baton Rouge Standard Metropolitan Statistical Area consists of East Baton Rouge Parish, Louisiana.

[3]The New Orleans Standard Metropolitan Statistical Area consists of Jefferson, Orleans, and St. Bernard Parishes, Louisiana.

[4]The Shreveport Standard Metropolitan Statistical Area consists of Bossier and Caddo Parishes, Louisiana.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Number of employees, United States	Index of employment change 1954 = 100: State or SMSA	Index of employment change 1954 = 100: United States	State or SMSA as a percent of the United States

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

NA Not available.

[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

[2]New Orleans City is coextensive with Orleans Parish.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	5 255	41 380	5 000	30 000
3441 and 3449	1 357	10 778	1 258	6 618
35 and 36	3 240	26 427	2 750	16 000

[6] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954–Continued

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups (3-digit) reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 6.—GENERAL STATISTICS FOR SELECTED PARISHES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Table 6.–GENERAL STATISTICS FOR SELECTED PARISHES BY INDUSTRY GROUP: 1958 AND 1954–Continued

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	Parish and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)
	WINN PARISH, TOTAL	38	6	802	2 216	722	1 559	1 867	4 609	362	[2]759	[2][3] 264
24	LUMBER AND WOOD PRODUCTS	30	5	748	2 060	679	1 487	1 770	4 357	325	(NA)	(NA)
242	SAWMILLS AND PLANING MILLS	6	3	563	1 648	520	1 196	1 423	3 510	156	(NA)	(NA)

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.

[1]The following parish-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

Parish	Industry group
Allen	262
Assumption	206
Bienville	242
Bossier	208
Caddo	321
Calcasieu	281, 282 & 291
East Baton Rouge	282 & 291
Jackson	262
Jefferson	203, 266, 281, 329, 341 & 373
La Salle	242
Morehouse	262
Orleans	205, 208, 212, 231, 232, 239, 26, 271, 329, 341 & 39
Quachita	262, 264, 265 & 281
St. Bernard	206 & 333
St. Charles	281 & 291
St. James	206
St. John the Baptist	206
Washington	263, 264 & 265
Webster	263

[2]The 1958 and 1954 parish totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR PARISHES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

PORTLAND:[3]						
1958	12 549	54 434	12 444	53 453	105	931
1954	13 161	45 884	13 125	45 626	36	258

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Lewiston-Auburn Standard Metropolitan Statistical Area consists of Auburn and Lewiston cities; and Lisbon Town in Androscoggin County, Maine. It was not defined as a standard metropolitan statistical area for 1954.

[3]The Portland Standard Metropolitan Statistical Area consists of Portland, South Portland, and Westbrook cities; and Cape Elizabeth and Falmouth Towns in Cumberland County, Maine.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see the Appendix to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273.....	795	8 209	786	6 389

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 manufacturing employees in 1958 or 1954)

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

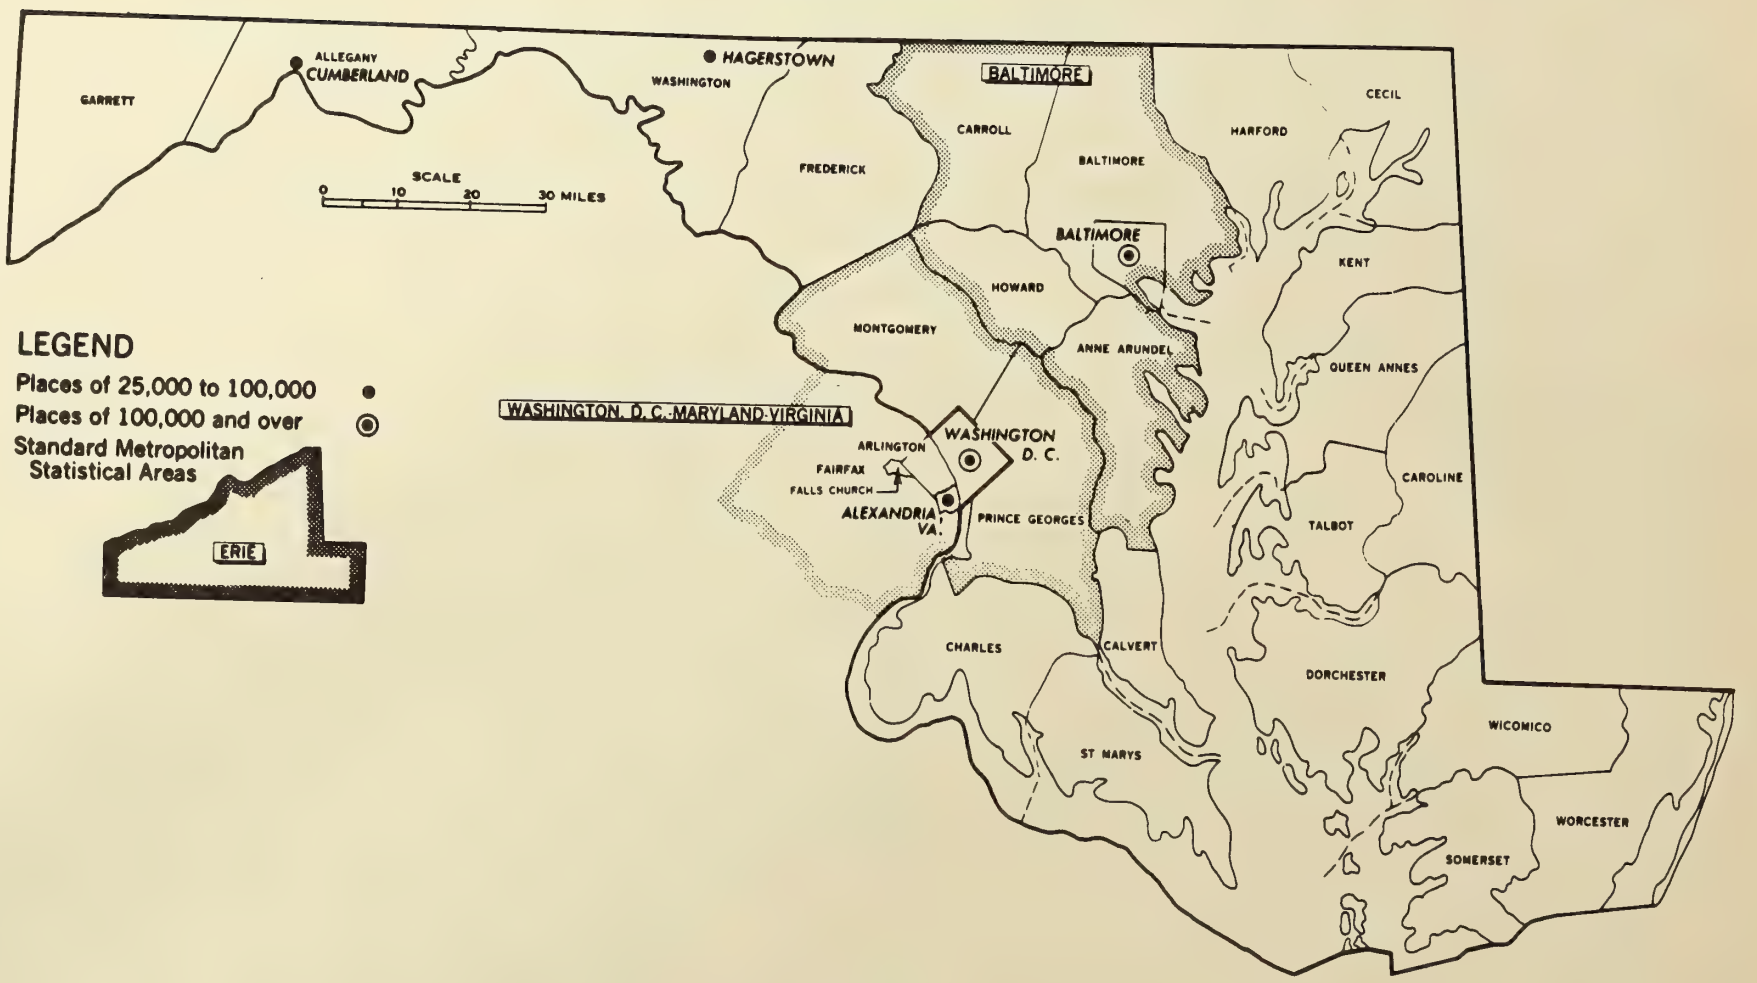
D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies.

County	Industry groups
Androscoggin	221 and 223
Aroostook	203 and 262
Cumberland	262, 314 and 372
Franklin	262 and 314
Hancock	262
Kennebec	221, 223, 232, 262, 264 and 314
Oxford	262 and 314
Penobscot	261, 262 and 314
Piscataquis	223
Sagadahoc	373
Somerset	314
Waldo	201
Washington	262
York	221, 223 and 355

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958



20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Baltimore Standard Metropolitan Statistical Area consists of Baltimore City; Anne Arundel, Baltimore, Carroll, and Howard Counties, Maryland.

[3]The Washington, D.C. Standard Metropolitan Statistical Area consists of the District of Columbia, Alexandria and Falls Church Cities and Arlington and Fairfax Counties, Virginia; Montgomery and Prince Georges Counties, Maryland.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	6 179	49 608	5,132	33,566
32 except 3273	7 695	87 966	7 080	58 304
3441 and 3449	2 180	19 528	1 530	12 105
35 and 36	27 235	257 387	24 300	176 400

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories". Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	5 222	60 689	5 231	46 308
327 except 3273	864	10 637	819	9 040
3441 and 3449	1 382	12 377	1 295	9 948
35 and 36	22 355	216 320	20 076	149 722

[5]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Allegany	262, 282, 301 and 321
Anne Arundel	398+399+190, 307,366, and 37
Baltimore City	203, 206, 221, 233, 259, 264
	271, 278, 284, 285, 291, 306, 314
	326, 329, 331, 333, 335, 341, 343
	346, 356, 366, 369, 371, 373 and 39
Baltimore County	208, 22, 265, 331, 335, 354, 366,
	372, 373, 381, 398+399+190
Dorchester	232
Frederick	231
Harford	302
Kent	203
Montgomery	366
Prince Georges	366 and 372
Talbot	203
Washington	233, 355, 372 and 393
Wicomico	37
Worcester	203

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Boston Standard Metropolitan Statistical Area consists of all of Suffolk County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn Cities and Arlington, Ashland, Bedford, Belmont, Burlington, Concord, Framingham, Lexington, Lincoln, Natick, North Reading, Reading, Stoneham, Sudbury, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester Towns in Middlesex County; Beverly, Lynn, Peabody, and Salem Cities and Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, Topsfield, and Wenham Towns in Essex County; Quincy City and Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Holbrook, Medfield, Milton, Needham, Norfolk, Norwood, Randolph, Sharon, Walpole, Wellesley, Westwood, and Weymouth Towns in Norfolk County; and Duxbury, Hanover, Hingham, Hull, Marshfield, Norwell, Pembroke, Rockland, and Scituate Towns in Plymouth County, Massachusetts.

[3] Comparable data for 1954 are not available due to a revision in the definition of the standard metropolitan statistical area. See the 1954 Census of Manufactures Area Statistics, Volume III, for statistics for the areas as defined at that time.

[4] The Brockton Standard Metropolitan Statistical Area consists of Brockton City and Abington, Bridgewater, East Bridgewater, Hanson, West Bridgewater, and Whitman Towns in Plymouth County; Avon and Stoughton Towns in Norfolk County; and Easton Town in Bristol County, Massachusetts.

[5] The Fall River Standard Metropolitan Statistical Area consists of Fall River City and Somerset, Swansea, and Westport Towns in Bristol County, Massachusetts; and Tiverton Town in Newport County, Rhode Island.

[6] The Fitchburg-Leominster Standard Metropolitan Statistical Area consists of Fitchburg and Leominster Cities and Lunenburg Town in Worcester County, and Shirley Town in Middlesex County, Massachusetts.

[7] The Lawrence-Haverhill Standard Metropolitan Statistical Area consists of Lawrence and Haverhill Cities and Andover, Groveland, Methuen, and North Andover Towns in Essex County, Massachusetts; and Plaistow and Salem Towns in Rockingham County, New Hampshire.

[8] The Lowell Standard Metropolitan Statistical Area consists of Lowell City and Billerica, Chelmsford, Dracut, Tewksbury, and Tyngsborough Towns in Middlesex County, Massachusetts.

[9] The New Bedford Standard Metropolitan Statistical Area consists of New Bedford City, Acushnet, Dartmouth, and Fairhaven Towns in Bristol County, and Marion and Mattapoisett Towns in Plymouth County, Massachusetts.

[10] The Pittsfield Standard Metropolitan Statistical Area consists of Pittsfield City, Dalton, Lenox, and Lee Towns in Berkshire County, Massachusetts.

[11] The Providence Standard Metropolitan Statistical Area consists of Central Falls, Cranston, Pawtucket, Providence, and Woonsocket Cities and Burrillville, Cumberland, East Providence, Johnston, Lincoln, North Providence, North Smithfield, and Smithfield Towns in Providence County, Narragansett and North Kingstown Towns in Washington County, Warwick City, Coventry, East Greenwich, and West Warwick Towns in Kent County, Jamestown Town in Newport County, and all of Bristol County, Rhode Island; Attleboro City, North Attleboro, and Seekonk Towns in Bristol County, Bellingham, Franklin, Plainville, and Wrentham Towns in Norfolk County, and Blackstone and Millville Towns in Worcester County, Massachusetts.

[12] The Springfield-Holyoke Standard Metropolitan Statistical Area consists of Chicopee, Holyoke, Springfield, and Westfield Cities and Agawam, East Longmeadow, Longmeadow, Ludlow, Monson, Palmer, West Springfield, and Wilbraham Towns in Hampden County, Northampton City, Easthampton, Hadley, and South Hadley Towns in Hampshire County, and Warrentown in Worcester County, Massachusetts.

[13] The Worcester Standard Metropolitan Statistical Area consists of Worcester City and Auburn, Berlin, Boylston, Brookfield, East Brookfield, Grafton, Holden, Leicester, Millbury, Northborough, Northbridge, North Brookfield, Oxford, Shrewsbury, Spencer, Sutton, Upton, Westborough, and West Boylston Towns in Worcester County, Massachusetts.

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas. Comparable data for years prior to 1958 are not available due to a revision in the definition of the standard metropolitan statistical area. See 1955-1957 Annual Survey of Manufactures; and 1954 Census of Manufactures Area Volume for statistics based on the area definition previously used.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.
[2]Not available due to a revision in the definition of the standard metropolitan statistical area after 1954.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	23 160	187 011	22 300	146 600
275 and 276	11 788	86 002	10 155	59 423
32 except 3273	10 014	89 862	10 399	76 191
327 except 3273	1 591	16 389	1 576	12 817
3441 and 3449	2 539	22 381	1 997	14 617
35 and 36	139 618	1 166 243	144 988	1 048 137

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

* The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]Comparable data for 1954 are not available due to a revision in the definitions of the standard metropolitan statistical areas. See the 1954 Census of Manufactures Area Statistics, Volume III, for statistics for the areas as defined at that time.

[3]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954–Continued

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Berkshire	221, 226, 264, 335, 361, 367 and 398 + 399 + 190
Bristol	225, 301, 307, 314, 356, 364, 366, 367 and 382
Essex	223, 231, 262, 302, 344, 361, 362, 366, 367, 371, 372, 394 and 398 + 399 + 190
Franklin	262, 342 and 354
Hampden	201, 208, 221, 223, 225, 249, 271, 278, 282, 284, 301, 307, 317, 32, 331, 339, 342, 344, 349, 351, 354, 355, 358, 367, 369, 372, 38, 394 and 398 + 399 + 190
Hampshire	223
Middlesex	203, 227, 235, 251, 262, 273, 29, 302, 307, 335, 362, 365, 371, 372, 383, 386, 387 and 398 + 399 + 190
Norfolk	225, 23, 265, 273, 277, 295, 302, 317, 356, 361, 366, 373, 381, 382, 391 and 398 + 399 + 190
Plymouth	229
Suffolk	205, 206, 225, 264, 306, 342, 367, 374 and 386
Worcester	221, 224, 235, 273, 329, 335, 339, 351, 385 and 387

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Ann Arbor Standard Metropolitan Statistical Area consists of Washtenaw County, Michigan.

[3] The Bay City Standard Metropolitan Statistical Area consists of Bay County, Michigan.

[4] The Detroit Standard Metropolitan Statistical Area consists of Macomb, Oakland, and Wayne Counties, Michigan.

[5] The Flint Standard Metropolitan Statistical Area consists of Genesee County, Michigan.

[6] The Grand Rapids Standard Metropolitan Statistical Area Consists of Kent County, Michigan.

[7] The Jackson Standard Metropolitan Statistical Area Consists of Jackson County, Michigan.

[8] The Kalamazoo Standard Metropolitan Statistical Area consists of Kalamazoo County, Michigan.

[9] The Lansing Standard Metropolitan Statistical Area consists of Clinton, Eaton, and Ingham Counties, Michigan.

[10] The Muskegon-Muskegon Heights Standard Metropolitan Statistical Area consists of Muskegon County, Michigan.

[11] The Saginaw Standard Metropolitan Statistical Area consists of Saginaw County, Michigan.

r Revised.

NA Not available. r Revised.

[1] Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2] For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3] The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee; for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4] The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5] See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	16,833	145,882	18,492	138,317
275 and 276	10,429	95,175	9,466	71,891
32 except 3273	14,918	180,099	17,349	164,432
327 except 3273	3,950	43,558	4,467	39,235
331 and 339	27,251	333,628	32,022	334,063
3441 and 3449	5,580	52,525	6,294	50,058
35 and 36	151,601	1,446,644	178,831	1,594,992

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	6,973	74,313	9,375	80,571

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954–Continued

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)

FOOTNOTES FOR TABLE 6

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Alger	26
Allegan	263 and 356
Alpena	324 and 355
Barry	354 and 359
Bay	336, 362 and 371
Berrien	264, 331, 336, 353, 358, 363, 365, 367 and 371
Calhoun	204, 265, 322, 332, 348, 352, 353, 359 and 372
Cass	358
Delta	262
Grand Traverse	37
Gratiot	371 and 379
Ingham	339, 352 and 371
Ionia	371
Jackson	301, 359, 371 and 372
Kalamazoo	192, 263, 265, 283, 371, 372 and 394
Lenawee	335, 336, 348, 358, 36 and 371
Macomb	192, 193, 326, 331, 332, 343, 351, 371, 372 and 39
Menominee	253
Midland	281 and 282
Monroe	263, 265 and 371
Montcalm	349, 363 and 371
Muskegon	252, 264, 351, 353, 358, 359, 363, 371 and 394
Newaygo	203
Oakland	202, 28, 306, 331, 371 and 372
Ottawa	31, 344, 362 and 371
Saginaw	332, 359, 371 and 399
St. Clair	289, 335 and 349
St. Joseph	259
Sanilac	379
Shiawassee	32 and 362
Washtenaw	359, 369, 371, 382 and 386
Wayne	193, 21, 229, 232, 265, 278, 281, 283, 291, 301, 306, 307, 31, 321, 323, 326, 335, 351, 352, 357, 373 and 374

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Duluth-Superior Standard Metropolitan Statistical Area consists of St. Louis County, Minnesota, and Douglas County, Wisconsin.

[3]The Minneapolis-St. Paul Standard Metropolitan Statistical Area consists of Anoka, Dakota, Hennepin, Ramsey, and Washington Counties, Minnesota.

rRevised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies. r Revised.
NA Not available.
[1] The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	4 626	67 744	6 569	105 466
3441 and 3449	2 560	25 355	1 868	15 433
35 and 36	38 675	344 684	30 030	225 679

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Anoka	372 and 398 + 399 + 190
Carlton	262 and 266
Dakota	201
Freeborn	201
Goodhue	314
Hennepin	225, 236, 265, 271, 275, 306, 351, 353, 359, 362, 381, 382, 384 and 398 + 399 + 190
McLeod	264
Mower	201
Nobles	201
Olmsted	357
Ramsey	205, 208, 231, 263, 271, 273, 284, 307, 329, 356, 357, 363, 367 and 371
St. Louis	232, 331 and 36
Stearns	328 and 363
Steele	391
Washington	243 and 289

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

1954	90 852	r238 681	90 641	237 350	211	1 331
STANDARD METROPOLITAN STATISTICAL AREAS						
JACKSON:[2]						
1958	r9 294	r34 550	9 228	34 177	r66	r373
1954	7 452	21 900	7 421	21 557	31	343

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Jackson Standard Metropolitan Statistical Area is coextensive with Hinds County, Mississippi.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC Code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	3,263	31,189	2,515	19,390
327 except 3273	528	5,049	426	2,901
3441 and 3449	412	3,032	288	2,243
35 and 36	5,093	45,701	3,390	24,700

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 manufacturing employees in 1958 or 1954)

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies.
[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

County	Industry Groups
Adams	261 and 301
Alcorn	232
Calhoun	232
Chickasaw	232

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Kansas City Standard Metropolitan Statistical Area consists of Clay and Jackson Counties, Missouri; and Johnson and Wyandotte Counties, Kansas.

[3] The St. Joseph Standard Metropolitan Statistical Area consists of Buchanan County, Missouri.

[4] The St. Louis Standard Metropolitan Statistical Area consists of St. Louis City and Jefferson, St. Charles, and St. Louis Counties, Missouri; and Madison and St. Clair Counties, Illinois.

[5] The Springfield Standard Metropolitan Statictical Area consists of Greene County, Missouri.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

NA Not available. r Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	11 494	105 100	10 790	69 100
275 and 276	8 924	67 187	8 934	57 592
32 except 3273	11 959	134 955	14 495	125 287
327 except 3273	2 461	21 432	2 532	17 031
3441 and 3449	2 179	24 678	2 903	24 300
35 and 36	42 492	358 080	45 041	319 448

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

Ind. code	Industry	1958									1954

D Withheld to avoid disclosing figures for individual companies. [r]Revised.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digits) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	6 657	51 848	7 040	41 479
327 except 3273	643	6 226	675	5 145
3441 and 3449	1 409	18 999	1 639	11 846
35 and 36	32 511	285 892	33 904	250 337

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies. rRevised.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Audrain	325
Boone	364
Buchanan	232, 264, and 369
Callaway	314
Cape Girardeau	314
Clay	285, 341, and 371
Cole	314
Franklin	314
Greene	265 and 371
Jackson	205, 208, 232, 233, 239, 25, 265, 271, 273, 275, 277, 291, 316, 327, 331, 344, 352, 355, 358, 366, 367, 371, 372, and 38
Jasper	372
Jefferson	321
Marion	314
Newton	372
Phelps	31
Pulaski	314
St. Charles	281 and 336
St. Francois	314
St. Louis County	26, 28, 344, 349, 354, 361, 362, 364, 371, and 372
St. Louis City	203, 204, 207, 209, 222, 229, 231, 232, 233, 235, 264, 271, 276, 278, 279, 281, 283, 313, 314, 317, 335, 341, 371, 373, 374, and 382
Ste. Genevieve	327
Saline	203 and 314
Scott	314
Stoddard	31
Stone	232
Wright	314

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

Table 1.—MANUFACTURING EMPLOYMENT AND PAYROLL FOR THE STATE AND ITS STANDARD METROPOLITAN STATISTICAL AREAS: 1958 AND 1954

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan statistical area, and year	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries[1]	
	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
MONTANA:						
1958	r 20 315	r 94 827	20 197	94 090	r 118	r 737
1954	18 519	72 090	18 373	71 289	146	801
STANDARD METROPOLITAN STATISTICAL AREAS						
(NONE IN THIS STATE)						

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

rRevised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes			
	Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)	Number of employees, United States	Index of employment change 1954 = 100: State or SMSA	Index of employment change 1954 = 100: United States	State or SMSA as a percent of the United States

	STANDARD METROPOLITAN STATISTICAL AREAS (None in this State)												

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

Table 3.—GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS, COUNTIES, AND SELECTED CITIES: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification. (See Introduction)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

[1] The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

a. Cascade—Industry groups 20 and 333
b. Deer Lodge—Industry groups 28 and 333
c. Flathead—Industry groups 242 and 333

[2] The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Lincoln Standard Metropolitan Statistical Area consists of Lancaster County, Nebraska.

[3]The Omaha Standard Metropolitan Statistical Area consists of Douglas and Sarpy Counties, Nebraska; and Pottawattamie County, Iowa.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
35 and 36	6 601	50 384	5 420	38 000

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

MANUFACTURES–AREA STATISTICS

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This state contained no standard metropolitan statistical area with 40,000 manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available. r Revised.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Dodge	201
Douglas	203, 208, 271, 33, 356, 366 and 396
Keith	367
Lancaster	306, 366, 375 and 398 + 399 + 190
Platte	344

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

Table 1.—MANUFACTURING EMPLOYMENT AND PAYROLL FOR THE STATE AND ITS STANDARD METROPOLITAN STATISTICAL AREAS: 1958 AND 1954

(This table includes data for all manufacturing employees including those located in central administrative offices and auxiliaries. Tables 2-7 in this report include data for operating establishments only. For explanation of column captions see Introduction)

State, standard metropolitan statistical area, and year	All establishments		Operating manufacturing establishments		Administrative offices and auxiliaries[1]	
	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)	Number of employees	Payroll ($1,000)
NEVADA:						
1958	r5 034	r27 095	5 004	26 780	r30	r315
1954	r5 723	r25 340	5 717	25 301	r6	r39
STANDARD METROPOLITAN STATISTICAL AREAS (None in this State)						

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The administrative and auxiliary unit employment figures are included with the operating establishments.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

Year	Establishments, number		All employees[1]		Production workers			Value added by manufacture, adjusted[2]	Capital expenditures, new	Number of employees[1] for the United States and comparative indexes

STANDARD METROPOLITAN STATISTICAL AREAS (None in this State)													

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data. rRevised.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	771	12 434	945	9 696

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954.)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Not applicable to this State.)

NA Not available. rRevised.

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Lawrence-Haverhill Standard Metropolitan Statistical Area consists of Lawrence and Haverhill Cities and Andover, Groveland, Methuen and North Andover Towns in Essex County, Massachusetts, and Plaistow and Salem Towns in Rockingham County, New Hampshire.

[3]The Manchester Standard Metropolitan Statistical Area consists of Manchester City and Goffstown Town in Hillsborough County, New Hampshire.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)												

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	1,344	10,177	1,609	10,146
327 except 3273	298	2,902	281	2,812
35 and 36	14,873	115,273	12,940	89,800

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1] The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Belknap	225 and 355
Cheshire	356
Coos	241, 261, 262, and 264
Grafton	223 and 314
Hillsborough	264, 361, 366, 367, and 394
Merrimack	223 and 275
Rockingham	22, and 335
Strafford	223, 35, 361, and 367
Sullivan	353

[2] The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Allentown-Bethlehem-Easton Standard Metropolitan Statistical Area consists of Lehigh and Northampton Counties, Pennsylvania; and Warren County, New Jersey.

[3] The Atlantic City Standard Metropolitan Statistical Area consists of Atlantic County, New Jersey.

[4] The Jersey City Standard Metropolitan Statistical Area consists of Hudson County, New Jersey.

[5] The Newark Standard Metropolitan Statistical Area consists of Essex, Morris, and Union Counties, New Jersey.

[6] The New York-Northeastern New Jersey Standard Metropolitan Statistical Area consists of New York City (Bronx, Kings, New York, Queens, and Richmond Counties); Nassau, Rockland, Suffolk, and Westchester Counties, New York; Bergen, Essex, Hudson, Middlesex, Morris, Passaic, Somerset, and Union Counties, New Jersey. This area is a consolidation of the New York, Newark, Jersey City, and Paterson-Clifton-Passaic Standard Metropolitan Statistical Areas plus Middlesex and Somerset Counties, New Jersey.

[7] The Paterson-Clifton-Passaic Standard Metropolitan Statistical Area consists of Bergen and Passaic Counties, New Jersey.

[8] The Philadelphia Standard Metropolitan Statistical Area consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pennsylvania; and Burlington, Camden, and Gloucester Counties, New Jersey.

[9] The Trenton Standard Metropolitan Statistical Area consists of Mercer County, New Jersey.

[10] The Wilmington Standard Metropolitan Statistical Area consists of New Castle County, Delaware; and Salem County, New Jersey.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

D Withheld to avoid disclosing figures for individual companies. [r]Revised.

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

3995	UMBRELLAS, PARASOLS AND CANES. . . .	6	2	246	755	229	377	643	868	1 526	(D)	(*)	(*)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265.	21 259	185 924	18 721	145 775
275 and 276.	13 992	118 171	12 493	85 303
32 except 3273	30 608	280 245	31 250	221 271
327 except 3273.	3 311	34 724	3 555	30 598
331 and 339.	7 595	79 942	13 973	113 664
3441 and 3449.	4 368	53 923	4 667	52 082
35 and 36.	165 213	1 395 944	168 633	1 267 648
3613 and 3622.	4 697	51 397	3 135	27 386
365, 366 and 367	66 368	549 955	62 223	475 444

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

Ind. code	Industry	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted

D Withheld to avoid disclosing figures for individual companies.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry Group
Bergen	205, 209, 263, 264, 273, 276, 283, 314, 335, 361, 365, 366, 367, 371, 372, 381, 384, 395, and 396
Burlington	225, 28, 306, 332, 335, 34, and 366
Camden	203, 208, 212, 225, 265, 299, 311, 329, 343, 355, 366, 367, 373, and 395
Cumberland	226 and 232
Essex	238, 271, 311, 316, 334, 357, 371, 372, 382, and 385
Gloucester	203, 281, 291, and 346
Hunterdon	262 and 332
Mercer	212, 307, 316, 331, 342, 343, 358, 364, 366, 394, and 398 + 399
Middlesex	21, 232, 252, 262, 264, 283, 284, 291, 306, 307, 317, 333, 356, 365, 367, 369, 371, 372, 384, 386, and 39
Monmouth	227 and 357
Morris	209, 232, 234, 263, 27, 283, 284, 317, 336, 355, 358, 366, and 372
Passaic	205, 231, 236, 314, 332, 335, 341, 361, 362, 366, 374, and 381
Salem	20, 281, and 322
Somerset	281, 283, 329, 356, 384, and 398 + 399 + 190
Union	205, 229, 232, 233, 264, 265, 273, 283, 284, 291, 31, 331, 332, 335, 336, 341, 345, 346, 355, 363, 364, 371, 372, 382, and 394
Warren	207, 281, 332, 353, 356 and 367

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3).
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

ALBUQUERQUE:[2]						
1958	6 677	32 267	6 613	31 944	64	323
1954	4 026	14 208	3 929	13 745	97	463

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Albuquerque Standard Metropolitan Statistical Area consists of Bernalillo County, New Mexico.

rRevised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)													

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

Table 3.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS, COUNTIES, AND SELECTED CITIES: 1958 AND 1954

(For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.

[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5] Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
327	335	2 554	251	1 296
32 except 3273	568	3 808	386	1 697

[6] Includes privately owned and or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted

NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Bernalillo	398 + 399 + 190

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the two years in Major Groups 32 and 35. (See footnote 1 to table 3.)

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products

[1] In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2] The Albany-Schenectady-Troy Standard Metropolitan Statistical Area consists of Albany, Rensselaer, Saratoga, and Schenectady Counties, New York.

[3] The Binghamton Standard Metropolitan Statistical Area consists of Broome County, New York.

[4] The Buffalo Standard Metropolitan Statistical Area consists of Erie and Niagara Counties, New York.

[5] The New York Standard Metropolitan Statistical Area consists of New York City (Bronx, Kings, New York, Queens, and Richmond Counties), and Nassau, Rockland, Suffolk, and Westchester Counties, New York.

[6] The New York-Northeastern New Jersey Standard Metropolitan Statistical Area consists of New York City (Bronx, Kings, New York, Queens, and Richmond Counties), Nassau, Rockland, Suffolk, and Westchester Counties, New York; Bergen, Essex, Hudson, Middlesex, Morris, Passaic, Somerset, and Union Counties, New Jersey. This area is a consolidation of the New York, Newark, Jersey City, and Paterson-Clifton-Passaic Standard Metropolitan Statistical Areas plus Middlesex and Somerset Counties, New Jersey.

[7] The Rochester Standard Metropolitan Statistical Area consists of Monroe County, New York.

[8] The Syracuse Standard Metropolitan Statistical Area consists of Madison, Onondaga, and Oswego Counties, New York.

[9] The Utica-Rome Standard Metropolitan Statistical Area consists of Herkimer and Oneida Counties, New York.

r Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies. rRevised.
NA Not available.

[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

[2]New York City consists of Bronx, Kings, New York, Queens, and Richmond Counties.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	49 969	417 973	47 965	341 603
275 and 276	51 631	468 847	49 569	378 398
32 except 3273	37 614	346 490	39 140	316 646
327 except 3273	5 819	65 333	5 795	54 290
331 and 339	36 296	379 243	47 276	398 533
3441 and 3449	13 012	122 953	9 268	79 044
35 and 36	277 787	2 439 199	270 371	2 122 781

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.—GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954–Continued

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)

Wayne	264, 306 and 367
Westchester	206, 272, 307, 326, 345, 365, 371, and 381
Wyoming	225

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3).
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Asheville Standard Metropolitan Statistical Area is coextensive with Buncombe County, North Carolina.

[3]The Charlotte Standard Metropolitan Statistical Area is coextensive with Mecklenburg County, North Carolina.

[4]The Durham Standard Metropolitan Statistical Area is coextensive with Durham County, North Carolina.

[5]The Greensboro-High Point Standard Metropolitan Statistical Area is coextensive with Guilford County, North Carolina.

[6]The Raleigh Standard Metropolitan Statistical Area is coextensive with Wake County, North Carolina.

[7]The Winston-Salem Standard Metropolitan Statistical Area is coextensive with Forsyth County, North Carolina.

[r]Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available. rRevised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

Table 3.—GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS, COUNTIES, AND SELECTED CITIES: 1958 AND 1954

(For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available. rRevised.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
275 and 276	...	...	2,466	14,037
32 except 3273	6,723	41,371	6,592	31,827
327 except 3273	1,890	11,716	1,796	9,241
3441 and 3449	1,295	10,138	2,277	17,508
35 and 36	...	...	17,231	103,824

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

rRevised.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing individual company figures.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industry groups (3-digit) reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35 (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

FOOTNOTES FOR TABLE 6

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry Group
Alamance	226, 251 and 366
Bladen	228
Buncombe	221, 222, 226, 242, and 282
Burke	20, 228, 23, 251 and 362
Cabarrus	221, 225, 226 and 228
Caldwell	222
Catawba	222, 238, 251 and 253
Cleveland	205, 221 and 23
Columbus	261
Cumberland	243
Davidson	202, 221, 222, 223, 228, 232 and 251
Davie	221
Durham	211, 214, 221, 225 and 239
Edgecombe	221
Forsyth	205, 211, 213, 214, 228, 251, 27 and 398 + 399 + 190
Franklin	222
Gaston	221, 222, 229, 356 and 371
Halifax	221, 222 and 26
Harnett	221
Haywood	262, 306, and 31
Henderson	222, 226 and 364
Hertford	244
Hoke	223
Iredell	221, 225, 232, 251 and 345
Johnston	232
Lee	23, 355 and 367
Lenoir	282
McDowell	221, 226, 228 and 251
Macon	225
Martin	263
Mecklenburg	221, 271, 332, 369 and 398 + 399 + 190
Montgomery	221, 234 and 242
Moore	222
Nash	222 and 228
New Hanover	222, 232 and 344
Person	222
Randolph	221, 222, 228, 251 and 36
Richmond	221, 222 and 223
Robeson	221 and 222
Rockingham	211, 214, 221, 222, 225, 227, 228 and 239
Rowan	221 and 226
Rutherford	222 and 23
Scotland	221 and 228
Stanly	225 and 333
Surry	222 and 225
Transylvania	262 and 282
Vance	228
Wake	221 and 361

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Industry Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 7.—DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

STANDARD METROPOLITAN STATISTICAL AREAS						
(None in this State)						

rRevised.

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

STANDARD METROPOLITAN STATISTICAL AREAS (None with 40,000 or more manufacturing employees in this State)													

NA Not available.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

Table 3.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS, COUNTIES, AND SELECTED CITIES: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2] The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See introduction.)

[3] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 or 1954.)

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)
	CASS COUNTY, TOTAL	55	18	1 966	8 883	1 431	2 788	6 080	16 870	887	[2]1 871	[2]10 799
20	FOOD AND KINDRED PRODUCTS	14	7	991	4 538	703	1 379	3 031	8 595	257	(NA)	(NA)

NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Cass	201

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Akron Standard Metropolitan Statistical Area consists of Summit County, Ohio.

[3]The Canton Standard Metropolitan Statistical Area consists of Stark County, Ohio.

[4]The Cincinnati Standard Metropolitan Statistical Area consists of Hamilton County, Ohio; and Campbell and Kenton Counties, Kentucky.

[5]The Cleveland Standard Metropolitan Statistical Area consists of Cuyahoga and Lake Counties, Ohio.

[6]The Columbus Standard Metropolitan Statistical Area consists of Franklin County, Ohio.

[7]The Dayton Standard Metropolitan Statistical Area consists of Greene, Miami, and Montgomery Counties, Ohio.

[8]The Hamilton-Middletown Standard Metropolitan Statistical Area consists of Butler County, Ohio.

[9]The Huntington-Ashland Standard Metropolitan Statistical Area consists of Cabell and Wayne Counties, West Virginia; Boyd County, Kentucky; and Lawrence County, Ohio.

[10]The Lima Standard Metropolitan Statistical Area consists of Allen County, Ohio.

[11]The Lorain-Elyria Standard Metropolitan Statistical Area consists of Lorain County, Ohio.

[12]The Springfield Standard Metropolitan Statistical Area consists of Clark County, Ohio.

[13]The Steubenville-Weirton Standard Metropolitan Statistical Area consists of Jefferson County, Ohio; and Brooke and Hancock Counties, West Virginia.

[14]The Toledo Standard Metropolitan Statistical Area consists of Lucas County, Ohio.

[15]The Wheeling Standard Metropolitan Statistical Area consists of Ohio and Marshall Counties, West Virginia; and Belmont County, Ohio.

[16]The Youngstown Standard Metropolitan Statistical Area consists of Mahoning and Trumbull Counties, Ohio.

[r]Revised

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available. r Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies. [r]Revised.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	23 339	197 836	23 570	172 092
275 and 276	26 895	233 719	25 239	179 297
32 except 3273	60 867	580 732	64 719	480 367
327 except 3273	6 835	68 718	10 219	80 796

39	MISCELLANEOUS MANUFACTURING[4]	16	2	(D)	(D)	(D)	(D)	(D)	(D)	(D)	(*)	(*)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)

Williams	372
Wood	321

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.
[4]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

1954	32 341	139 712	30 846	131 442	1 495	8 270

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Oklahoma City Standard Metropolitan Statistical Area consists of Cleveland and Oklahoma Counties, Oklahoma.

[3]The Tulsa Standard Metropolitan Statistical Area consists of Creek and Tulsa Counties, Oklahoma.

[r]Revised.

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

	(None with 40,000 or more manufacturing employees in this State)												

NA Not available. [r]Revised.

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies. rRevised.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	5 770	57 000	5 847	48 451
327 except 3273	942	10 181	809	7 837
3441 and 3449	2 605	22 457	2 409	15 708
35 and 36	11 495	96 278	11 119	79 150

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(This State contained no standard metropolitan statistical area with 40,000 or more manufacturing employees in 1958 and 1954)

Table 6 –GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.

[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry group
Creek	322
Kay	291 and 333
Oklahoma	271
Okmulgee	321
Ottawa	301
Payne	291
Pottawatomie	367 and 372
Stephens	353
Tulsa	221, 271, 291, 332, 372 and 379
Washington	333 and 356

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparabiltiy of 1958 and 1954 statistics.

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

PORTLAND:[2]						
1958	r58 334	r296 179	57 037	288 400	r1 297	r7 779
1954	57 453	244 096	56 729	239 997	724	4 099

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Portland, Standard Metropolitan Statistical Area consists of Clackamas, Multnomah, and Washington Counties in Oregon and Clark County in Washington.

rRevised

Table 2.—GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

[1]Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2]For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3]The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4]The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5]See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.

Table 4.–GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments for 1 establishment to another in the same industry classification contained in these figures. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
32 except 3273	1 682	16 111	1 266	9 720
327 except 3273	677	7 116	445	3 163
3441 and 3449	1 370	13 846	1 606	9 783
35 and 36	6 529	67 350	4 718	40 697

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1] In order to avoid disclosing figures reported by individual companies, the statistics for some industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate major industry group (2-digit) lines and the "All industries, total."

[2] The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[3] The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

Table 6.–GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The following county-industry group lines had 500 or more employees but are not shown in the table because publication of these figures would disclose data reported by individual companies:

County	Industry Group	County	Industry Group	County	Industry Group
Clackamas	262	Multnomah	203, 205, 225, 233, 239, 265, 271, 275, 331, 332, 333, 341, 353, 371, 372 and 373	Polk	203
Columbia	242 and 262			Washington	361
Lane	203				
Marion	243 and 262				

[2]The 1958 and 1954 county totals are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3)
[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics

Table 7.–DISTRIBUTION OF ESTABLISHMENTS BY EMPLOYMENT SIZE CLASS AND BY MAJOR INDUSTRY GROUP, FOR COUNTIES: 1958

20 Food and kindred products
21 Tobacco products
22 Textile mill products
23 Apparel and related products
24 Lumber and wood products
25 Furniture and fixtures
26 Paper and allied products
27 Printing and publishing
28 Chemicals and allied products
29 Petroleum and coal products
30 Rubber and plastic products, n.e.c.
31 Leather and leather products
32 Stone, clay, and glass products
33 Primary metal industries
34 Fabricated metal products
35 Machinery, except electrical
36 Electrical machinery
37 Transportation equipment
38 Instruments and related products
39 Miscellaneous manufactures (Includes Group 19 Ordnance and accessories)

(Counties and size classes in which no manufacturing establishments were reported are omitted)

[1]In addition to the employment and payroll reported for operating manufacturing establishments, manufacturing concerns ordinarily reported separately for central administrative offices or auxiliary units (e.g., research laboratories, storage warehouses, power plants, garages, repair shops, etc.) which service the manufacturing establishments of a company. A separate report was usually obtained for each central office or auxiliary unit if it was located at a different location from the manufacturing establishment(s) served or if it serviced 2 or more manufacturing establishments and was not operated as an integral part of the establishment at the same location. Employment and payroll of central administrative offices and auxiliaries are included in the totals for the State.

[2]The Allentown-Bethlehem-Easton Standard Metropolitan Statistical Area consists of Lehigh and Northampton Counties, Pennsylvania; and Warren County, New Jersey.

[3]The Altoona Standard Metropolitan Statistical Area consists of Blair County, Pennsylvania.

[4]The Erie Standard Metropolitan Statistical Area consists of Erie County, Pennsylvania.

[5]The Harrisburg Standard Metropolitan Statistical Area consists of Cumberland and Dauphin Counties, Pennsylvania.

[6]The Johnstown Standard Metropolitan Statistical Area consists of Cambria and Somerset Counties, Pennsylvania.

[7]The Lancaster Standard Metropolitan Statistical Area consists of Lancaster County, Pennsylvania.

[8]The Philadelphia Standard Metropolitan Statistical Area consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pennsylvania; and Burlington, Camden, and Gloucester Counties, New Jersey.

[9]The Pittsburgh Standard Metropolitan Statistical Area consists of Allegheny, Beaver, Washington, and Westmoreland Counties, Pennsylvania.

[10]The Reading Standard Metropolitan Statistical Area consists of Berks County, Pennsylvania.

[11]The Scranton Standard Metropolitan Statistical Area consists of Lackawanna County, Pennsylvania.

[12]The Wilkes-Barre-Hazleton Standard Metropolitan Statistical Area consists of Luzerne County, Pennsylvania.

[13]The York Standard Metropolitan Statistical Area consists of York County, Pennsylvania.

[r]Revised.

Table 2.–GENERAL STATISTICS FOR THE STATE AND SELECTED STANDARD METROPOLITAN STATISTICAL AREAS WITH COMPARATIVE UNITED STATES DATA: 1958 AND EARLIER YEARS

(Selected standard metropolitan statistical areas include those with 40,000 or more manufacturing employees. For explanation of column captions see Introduction)

NA Not available.

[1] Employment and payroll totals for the central administrative offices and auxiliaries are not included in the statistics shown in tables 2-7 of this report.

[2] For the period 1956-1958, value added by manufacture represents adjusted value added and for earlier years, unadjusted value added. Unadjusted value added is obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, the difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) the net change in finished goods and work-in-process inventories between the beginning and end of the year.

[3] The 1958 Census of Manufactures figures include establishments classified in Industry 3273, Ready-mixed concrete, and establishments classified in Industry 3599, Machine shops, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939-1957, but are included for 1929 and earlier years. The 1954-1958 figures include data for establishments engaged in the processing and distribution of fluid milk, Industry Group 202, Dairy Products. These establishments were not included in the figures for earlier Census years. In addition, the 1958 and 1954 Census and the Annual Survey figures include data for Logging camps and contractors, Industry 2411, which were not included within the scope of the 1947 Census. There were also a number of changes in the definition of manufacturing industries during earlier Census years that affect the comparability of the historical series. Among the more important of these were: Figures for 1935 and later years exclude data for "Railroad repair shops" and "Manufactured gas" which were included in 1899-1933 figures; the minimum size of establishment included for 1947-1958 was 1 employee, for 1921-1939 manufacturing establishments reporting value of shipments of $5,000 or more were within scope whereas for 1919 and earlier years the cutoff was $500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

[4] The data for operating manufacturing establishments for 1955-1957 are estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures Volume for the respective periods.

[5] See footnotes to table 1 for definitions of the standard metropolitan statistical areas.

D Withheld to avoid disclosing figures for individual companies.
NA Not available.
[1]The 1954 data are not strictly comparable with the figures shown for 1958 due to differences in coverage of Ready-mixed concrete establishments and Machine shops engaged exclusively or almost exclusively in machine shop repair work. For further information, see footnote 3 to table 2 and Appendix A.
[2]Philadelphia City is coextensive with Philadelphia County.

Table 4.—GENERAL STATISTICS BY INDUSTRY GROUP AND INDUSTRY: 1958 AND 1954

(For explanation of column captions see Introduction)

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The total value of shipments figures for industry groups and a few individual industries have not been published due to the extensive and unmeasurable duplication arising from shipments from 1 establishment to another in the same industry classification. (See Introduction.)

[3]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.)

[4]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[5]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
264 and 265	24 942	236 540	24 933	186 127
275 and 276	25 838	192 556	23 791	150 158
32 except 3273	59 532	557 361	64 841	495 123
327 except 3273	5 615	49 096	5 926	40 178
331 and 339	181 549	1,882 350	202 695	1,567 544
3441 and 3449	20 374	181 236	19 777	168 609
35 and 36	208 387	1,947 040	222 414	1,866 433

[6]Includes privately owned and/or operated establishments classified in Major Industry Group 19, "Ordnance and Accessories." Establishments which are Government-owned and operated are not included.

Table 5.–GENERAL STATISTICS FOR STANDARD METROPOLITAN STATISTICAL AREAS WITH 40,000 OR MORE MANUFACTURING EMPLOYEES, BY INDUSTRY: 1958 AND 1954

*The 1954 figures are not shown (a) to avoid disclosing figures for individual companies or (b) because of revisions in the Standard Industrial Classification system which resulted in noncomparable data.

D Withheld to avoid disclosing figures for individual companies.

[1]In order to avoid disclosing figures reported by individual companies, the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups reporting less than 100 employees are also omitted. They are included, however, in the appropriate industry group lines and the "All industries, total."

[2]The 1958 and 1954 "All industries, total" are not strictly comparable because of differences in scope between the 2 years in Major Groups 32 and 35. (See footnote 1 to table 3.

[3]The 1954 data for this industry are not strictly comparable with 1958 figures shown in the table. See Appendix A for further information on the comparability of 1958 and 1954 statistics.

[4]Comparable data for selected industry groups are not available due to the adoption of the revised Standard Industrial Classification for 1958. For a complete description of these revisions, see Appendix A to this report. However, selected 1954 figures have been retabulated to make them comparable to the 1958 data and are shown in the following table:

1958 SIC code	1958		1954	
	Employment, total	Value added by manufacture, adjusted ($1,000)	Employment, total	Value added by manufacture, adjusted ($1,000)
Philadelphia:

Table 6.—GENERAL STATISTICS FOR SELECTED COUNTIES BY INDUSTRY GROUP: 1958 AND 1954—Continued

(Separate industry group data are shown for all industry groups with 500 or more employees within a county except those that would disclose figures for individual companies. For explanation of column captions see Introduction)

Ind. code	County and industry group[1]	1958									1954	
		Establishments, number		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees, number	Value added by manufacture, unadjusted
		Total	With 20 or more employees	Number	Payroll ($1,000)	Number	Man-hours (1,000)	Wages ($1,000)	($1,000)	($1,000)		($1,000)
